SUMMARY

Frontend Developer with hands-on experience in building responsive and interactive web applications using HTML, CSS, JavaScript (ES6+), and React.js. Strong understanding of DOM manipulation, asynchronous JavaScript, REST API integration, and modern frontend development practices. Currently expanding backend skills with Node.js, Express, and MongoDB through structured offline training.

PROJECTS

CareerCoded – Educational Platform Website

[Live Link](#)

- Developed a modern and responsive frontend using HTML, CSS, and JavaScript
- Implemented mobile-first design ensuring compatibility across all screen sizes
- Improved UI consistency, layout structure, and overall user experience

Daily Scoop – Frontend Website Clone

[Live Link](#)

- Built a responsive health and fitness brand website using HTML, CSS, and JavaScript
- Created structured UI components with clean and reusable layouts
- Optimized the website for desktop, tablet, and mobile devices
